

Kitchen & Bathroom Concept

For project "Plaza de Toros"

Updated 2022-02-11

Design Concept - Kitchen

The kitchen has an open plan design with a white "marble-ish" floor with tones. Walls and roof in white. The kitchen must be very bright and very open. Only upper cabinets where there are walls.

The doors to the cabinet must be shiny and match will the beige/brown tones in the floor. With a white worktop in granite (or similar).

The kitchen island will offer space for eating (2-4 seats, high chairs).

The illumination will be for the supplier to suggest/solve. But downlights from the upper cabinets would be the right thing (light very warm, around 2.000-2.700 kelvin and dimmable).

Both the quality and design of the kitchen must be high class, as the kitchen will be the mainspot of the apartment.

Features - Kitchen (photos at www.penthouzez.com/inspiration/kitchen-concept/)

- Two watersinks (one for dish and one for food preparation)
- The taps should be white or gold and with a strong "designfeeling".
- Only wall cabinets where there are walls.
- The cabinets must have push & open function as no handle is allowed.
- The column must be integrated in the long kitchen island.
- Integrated vacuumcleaner by the floor.
- Fridge/freezer must be integrated in the lower cabinets. Drawer function (model Fisher & Paykel).
- The hob must be induction and with integrated kitchen fan (model Siemens).
- The kitchen must have a combined oven/micro.
- The kitchen also must have a dishwasher.

Design Concept - Bathrooms

The three bathrooms will be in same style as the kitchen.

By having this you will get a "whole concept integrated feeling".

The bathrooms furniture must be for the supplier of the kitchen cabinets and doors. Also the worktop.
